Instructions for Oiling and Cleaning ITG Foam Air Filters

If your ITG filter has **not** been pre-oiled please see the information below. Use of an un-oiled or dry foam filter is specifically not recommended as this will reduce filter efficiency by allowing small dust particles to pass through the filter into your engine.

Recently ITG has performed testing to determine which foam filter oils and cleaners perform best from a foam durability perspective. Based on these results Coast Fabrication now recommends the use of, and offers products manufactured by the Rock Oil Company. Although not well known in the US, Rock Oil is a very well respected provider of oils in England and throughout Europe.

Rock Oil "**Factory Eco Foam**" is a synthetic foam filter oil that is water washable and has received high praise from ITG and Coast Fabrication.

Rock Oil "**Factory Foam**" has also gotten outstanding results however this oil is **not** water washable and must be cleaned with their "**Factory Foam Kleen**". If use of a solvent based cleaner is not an issue, these two products are also recommended.

For best results please carefully follow the directions for oiling and cleaning found on the Rock Oil container.

Coast Fabrication recommends that US customers purchase and use these Rock Oil products on their ITG filters. Should you have preference to use a foam filter oil or cleaner from another manufacturer please contact us beforehand.

Under no circumstances should cotton gauze filter oil such as K&N or any other oil not specifically designed and manufactured for foam air filters be used. This oil will likely not stick to the foam and could allow dust through the filter with the risk of causing engine or MAF sensor damage.

For ten years Coast Fabrication recommended and sold No-Toil foam filter oil and cleaner and achieved very good results with them. The recent testing has convinced us that Rock Oil products will perform at the highest level. Because of advantages offered by being in full alignment with the ITG factory we now recommend and sell Rock Oil products.

Please telephone Coast Fabrication at (714) 842-2603 or e-mail us at info@coastfab.com with any questions regarding care and maintenance of your ITG air filter.
